DISSERTATION

"Barriers to Access: Essays on How Markets, Stigma, and Firms Shape Health and Well-Being"

Committee: Amalesh Sharma (Chair), David A. Griffith, Yan (Lucy) Liu, Michael C. Withers (External, Management)

Essay 1 (Job Market Paper): "The Residual Segment: How Market Segmentation Shapes What Customers Receive in Health Care" (with Amalesh Sharma and Sarang Sunder)

> *Abstract:* Firms and regulators often pool customers who fit no core market into a residual segment. Does belonging to this segment change the service customers receive? We study a 2023 reform that dissolved a residual insurance pricing region and merged its mostly rural counties into nearby metropolitan markets, while care stayed in the same hospitals. Using a difference-in-differences design and 1.97 million hospital admissions, we find that integration raised service use by 9.5%, increased the chronic conditions providers recorded by 3.6%, and cut seven-day mortality by 17%. Effects were largest for patients with the most varied needs. Segment boundaries shape what providers learn about customers and what customers receive.

Essay 2: "When Barriers Redirect Demand: Channel-Selective Deterrence Across Service Modes" (with Praveen K. Kopalle and Amalesh Sharma)

Essay 3: "Prioritizing Workforce Mental Health for Marketing Excellence and Firm Performance" (with David A. Griffith and Amalesh Sharma)

HONORS, AWARDS, AND FELLOWSHIPS

Outstanding Research Award, Mays Business School, Texas A&M University 2026
AMA-Sheth Foundation Doctoral Consortium Fellow, Fordham University 2026
Best Overall Paper Award, AMA Marketing & Public Policy Conference 2025

Teaching Experience

Instructor of Record, MKTG 323: Marketing Research (required undergraduate course), two sections Fall 2024

Overall instructor effectiveness, Section 503: **4.19 / 5.00** (84% response rate)
Overall instructor effectiveness, Section 504: **4.10 / 5.00** (84% response rate)
Career preparation: helped students secure internships and prepare for the workforce
Teaching mentor: Leslie S. Seipp, Senior Lecturer and Assistant Department Head

Research and Professional Experience

Research Assistant, Department of Marketing, Indian Institute of Management Udaipur 2020–2022

Business Analyst, Accenture, India 2014–2015

Doctoral Coursework

Marketing: Marketing Models; Buyer Behavior; Marketing Strategy; Theory Construction

Economics and Statistics: Econometric Theory I and II; Advanced Topics in Econometrics; Distribution Theory; Applied Multivariate Analysis; Statistical Methods in Finance

Computer Science: Machine Learning; Statistical Computing in R and Python

Technical Skills

Programming: R, Python, Stata, SAS, SPSS

Methods: Causal inference (quasi-experimental and panel designs, instrumental variables), machine learning, and natural language processing

Data: Large-scale archival and administrative data, including firm financial and market data, corporate disclosures, hospital and patient records, and field-study data
